

## 2009 Crop Production Clinic videos available online

Lowell Sandell and Mark Bernards

04/29/2009

The first annual Crop Production Clinics were held at eight locations across Nebraska (Beatrice, Fremont, Gering, Hastings, Kearney, Norfolk, North Platte, and York) in January 2009. The clinics provide valuable information to help crop producers and agribusiness professionals improve their profitability and safety. The Crop Production Clinics succeed the Crop Protection Clinics which had been conducted annually since 1974.

The Crop Production Clinics featured presentations from extension specialists and educators on soil fertility, soil water and irrigation management, crop production, pesticide safety, and weed, disease, and insect pest management topics. The programs for each location were tailored to meet the needs of cropping systems in that part of the state.

In 2009 we recorded many of the presentations given at the different clinic locations. These video presentations are now available at <http://cpc.unl.edu>. To view the videos click on the "2009 Video Presentations" at the top of the page. Presentations recorded at the Fremont, Hastings, York, North Platte, and Gering locations are available. The videos are grouped by discipline. Clicking on a discipline tab will allow you to see the individual presentation title, speaker, and location. Click on the title to view the video.

**Know how. Know now.**

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska-Lincoln cooperating with the Counties and the United States Department of Agriculture.
